

PM

Introduction

性能管理构件，接收性能参数，并自动生成报告。

Installation

maven

```
<dependency>
  <groupId>sse.tongji.bookish-meme</groupId>
  <artifactId>pm</artifactId>
  <version>1.0.0</version>
</dependency>
```

Usage

Initialization

```
Log log = new Log();
```

Customize

设置多长时间后开始写日志 `java log.setDelay(60000);` 设置日志间隔

```
java log.setInterval(60000);
```

Set Parameter

设置性能参数 `java log.setParam("key",value)`

Run

```
log.run();
```

Stop

```
log.stop();
```
