TZLicense

Introduction

一个方便对消息进行流量控制的组件

Installation

`maven`

```
<dependency>
    <groupId>sse.tongji.bookish-meme</groupId>
    <artifactId>tzlicense</artifactId>
    <version>1.0.1</version>
</dependency>
```

Usage

这里有两种类型的TZLicense - PerSecondCountLicense - SumCountLicense

PerSecondCountLicense

Initialization

```
TZLicense tzLicense = new PerSecondCountLicense(100);
tzLicense.tryAcquire()
```

reset

```
tzLicense.reset();
```

PerSecondCountLicense

```
TZLicense tzLicense = new PerSecondCountLicense(5);
tzLicense.tryAcquire()
```

reset

```
tzLicense.reset();
```
